

Celebrating

International Day of Persons with Disabilities 3rd of December

In honor of this important day, we are pleased to announce that the Electronic Health Literacy Handbook is available in **Braille and audio formats** in English, Polish, Romanian, Lithuanian, Croatian, Bulgarian and Greek.

We sincerely hope that this milestone of the eHELPEd-iT project ensures that the persons who are visually impaired can access essential electronic health literacy resources with greater ease and independence.

Together, we can build a world where information
is accessible to all!

You can download or view for free the Braille and
audio formats [here](#) or scan the QR code!
